Work Offered

Talys Consulting is one of the most successful companies in the financial sector in Tunisia. It's a consulting firm specialized in organization, information systems and digital transformation that has managed to export to the Maghreb and African markets thanks to a team of functional and technical consultants who acquire several business expertise: Banking, insurance, microfinance and leasing. First off, the trainee will research, design and develop software programs in both the front-end and back-end. He/she will be working on the feasibility study and realization of a microservice architecture and web services. Moreover, the intern will manipulate DataBase Management System (DBMS) such as SQL Server guaranteeing the quality, durability and confidentiality of the information. He/she should be able to manage and plan a project with agile development methods such as Scrum and Agile. Furthermore, his/her duties will include measuring the quality of the source code that can therefore give an idea of the maintainability of the software being measured. Finally, In order to immediately detect and correct possible errors, the trainee will also integrate changes to the computer code of a software project on a continuous basis. Ultimately, he/she will help in a project management aiming to organize the smooth running of a project and achieve its objectives.
